Balance

Put down your phone and regain the balance of life.

Balance is designed for those who are addicted to smart-phones, it advocates a balanced life between work and amusement.

Balance is inspired by a balance scale. When off, the lamp remains down. To turn on the lamp, the user must insert a smart phone into the slot on the rear. As the lamp rises, it automatically goes on. The user will be faced with the question: whether keep working, or give in to the temptation of using phone and lose light.
